BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

As rescanning documents will not correct images, please do not report the images to the Image Problem Mailbox.

Abstract (Basic): JP 2000044666 A

NOVELTY - A crystallized polyester prepolymer obtained by melt polycondensation, is maintained in the melting state and introduced into a medium and solidified. The medium is maintained at a temperature lower than the melting point of prepolymer by 30 deg. C and lower than solid phase polycondensation by 60 deg. C, so that the prepolymer is polycondensed in solid phase.

USE - The method is used for obtaining macro molecular polyester. ADVANTAGE - Macro molecular polyester having improved quality, is obtained by an efficient method.
